Bellari

VP129 Tube Phono Preamp

OWNERS MANUAL

INTRODUCTION

Thank you for your purchase of the Bellari VP129 Tube Phono Preamp. The VP129 is designed to amplify an RIAA equalized phono signal to a Hi-Fi level signal, and is intended for magnetic pickups. Since the unit utilizes tube circuitry, the resulting output signal is more warm and musical than solid state preamplifiers.

INSPECTION

1. Unpack and Inspect the VP129 package

Your VP129 was carefully packed at the factory in a protective carton. Nonetheless, be sure to examine the unit and the carton for any signs of damage that may have occurred during shipping. If obvious physical damage is noticed, contact the carrier immediately to make a damage claim. We suggest saving the shipping carton and packing materials for safely transporting the unit in the future.

2. Please complete the Warranty Registration Card and return it to the factory, or you may register on-line at www.rolls.com.
